SUMMARY

Software Development Engineer - 1 with over 14 months of experience in full-stack development. I specialize in building responsive and intuitive UIs with **React** for websites, **React Native** for mobile applications, creating models & APIs using **Django** for back-end, and managing databases with **PostgreSQL** for a platform serving 12k+ daily users. With a strong record in designing and optimizing software systems focused on quality, efficiency, and scalability, I am committed to driving innovation and excellence in software development.

EDUCATION

Indian Institute of Technology, Madras

2018 - 2023

Dual Degree - B.Tech & M.Tech, Mechanical Engineering

CGPA 7.13

PROFESSIONAL EXPERIENCE

K12 Techno Services Pvt. Ltd | SDE - 1

Jun 2023 – Aug 2024

Tech Stack: React | Javascript | Python | Django | SQL | PostgreSQL | Figma

- Built a responsive auto-assessment module for ERP systems using React with dynamic UI and Bloom's-taxonomy-based evaluations
- Improved **efficiency by 40%** for enterprise B2B clients by **reducing data creation** time by **25%**
- Implemented branch-wise content versioning across modules, improving content management by 20% for multiple school branches
- Led development of **domain mgmt. dashboard** with real-time status tracking, certificate alerts & monitoring APIs for **100+ domains**
- Enhanced **user management system** with multi-designation support, streamlining administration and UI workflows for **150,000+ users**
- Led development of a unified **Transport Dashboard** consolidating workflows with a 70:30 split-view UI, filters & responsive pagination
- Refactored legacy **CRM** backend models and business logic, cutting API response time by 33% (~60s to ~40s)

SKILLS

Programming: Python, JavaScript, Typescript, Java, SQL, HTML5, CSS

Frameworks & Libraries: React JS, Next JS, React Native, Node JS, Express JS, Django, Fast API, Redux, Bootstrap, Tailwind CSS

Databases & Querying: MongoDB, MySQL, PostgreSQL, Redis

DevOps & Design Tools: Git, Github, Bitbucket, Postman, Figma, DrawSQL, Canva

Software: PgAdmin, Excel, Power BI, MATLAB, Android Studio

Concepts: Data Structures & Algorithms, REST APIs, System Design Basics, Agile/Scrum

Soft Skills: Problem solving, ownership mindset, teamwork, analytical thinking

PROJECTS

Real-time Stock Portfolio Dashboard

Tech Stack: React | Next JS | Typescript | Node JS | Express JS

- Designed and built an end-to-end **portfolio dashboard** tracking live CMP, **P/L**, and sector-wise performance for **20+ stocks**
- Developed **REST APIs for NSE & BSE data** fetching CMP and fundamentals (P/E, earnings), handling **50+ requests per call**
- Implemented **in-memory caching** for market prices and fundamentals, reducing external data fetches by **~40–50%**
- Optimized frontend computations using **useMemo**, cutting unnecessary re-renders during price refresh cycles by **~30%**
- Added 60s auto-refresh with loaders, error handling, and conditional gain/loss highlighting, enhancing UI responsiveness & usability

AI-Powered Movie Recommendation Platform

Tech Stack: React | JavaScript | FastAPI | Python

- Built an **AI-powered movie recommendation engine** using semantic embeddings, to deliver personalized results from **1K+ movies**
- Implemented **FastAPI-based REST services** handling **100–200 similarity comparisons per request**
- Applied **Sentence Transformers + cosine similarity** to improve recommendation relevance by **~40%** over genre-based
- Developed a **React frontend** enabling real-time search and AI-driven recommendations

INTERNSHIP EXPERIENCE

Ylurn Technology | Mobile APP Developer

Feb 2021 – Apr 2021

- Formulated the **seller-side app** for a shopping platform using JavaScript **React native**, **Express JS** and **Axios** for HTTP request
- Designed an interactive, responsive UI with one-way data flow and integrated with **REST APIs** for seamless data management

Eduvisory | Web Developer

Jun 2020 – Dec 2020

- Built the Eduvisory website with React JS to assist students in 20+ countries, using responsive **Ant Design** and **Material UI** navigation
- Implemented **login authentication** with **Express JS** and **MongoDB**, and built a forum to manage user queries and responses
