SUMMARY

SDE-1 with **1.3+** years building scalable full-stack applications using **React**, TypeScript, Django, and PostgreSQL. Experienced in REST API design, Microservices, and Agile delivery for platforms serving **12k+ daily users**. Skilled in frontend performance optimization and cross-browser compatible UI development.

EDUCATION

Indian Institute of Technology, Madras

2018 - 2023

Dual Degree - B.Tech & M.Tech, Mechanical Engineering

CGPA 7.13

PROFESSIONAL EXPERIENCE

K12 Techno Services Pvt. Ltd | SDE - 1

Jun 2023 – Aug 2024

Tech Stack: React | JavaScript | Python | Django | SQL | PostgreSQL | Figma

- Developed a responsive auto-assessment module for **ERP** systems using React, reducing manual evaluation effort and improving UX
- Reduced data creation time by **25%**, improving overall workflow **efficiency by 40%** for enterprise **B2B clients**
- Implemented branch-wise content versioning across modules, improving content management by **20%** for multiple school branches
- Led development of **domain mgmt. dashboard** with real-time status tracking, certificate alerts & monitoring APIs for **100+ domains**
- Enhanced **user management system** with multi-designation support, streamlining administration and UI workflows for **150,000+ users**
- Led development of a unified **Transport Dashboard** consolidating workflows with a **70:30 split-view UI**, filters & responsive pagination
- Refactored legacy **CRM** backend models and business logic using Python/Django, cutting API response time by **33%** (~60s to ~40s)

SKILLS

Programming languages: Python, JavaScript, Typescript, Java, SQL, HTML5, CSS

Frameworks & Libraries: React JS, Next JS, React Native, Node JS, Express JS, Django, Fast API, Redux, Tailwind, Webpack/Vite

Databases & Testing: MongoDB, MySQL, PostgreSQL, Redis, Jest, Unit Testing, API Testing (Postman)

Cloud & DevOps: Git, Github, Bitbucket, CI/CD, Docker, AWS, Firebase, Kubernetes, Linux/Unix

Software: PgAdmin, Excel, Power BI, MATLAB, Android Studio, Figma, DrawSQL, Canva

Concepts: Data Structures & Algorithms, Microservices, REST APIs, System Design, Event-Driven Architecture, Agile/Scrum

Soft Skills: Problem solving, ownership mindset, teamwork, analytical thinking

PROJECTS

Real-time Stock Portfolio Dashboard

Tech Stack: React | Next JS | Typescript | Node JS | Express JS

- Designed & built an end-to-end **portfolio dashboard** tracking live CMP, **P/L**, sector-wise performance for **20+ stocks** using typescript
- Developed **REST APIs for NSE & BSE data** fetching CMP and fundamentals (P/E, earnings), handling **50+ concurrent API calls**
- Implemented **in-memory caching** for market prices and fundamentals, reducing external data fetches by **~40–50%**
- Optimized performance using **useMemo** and **React Query** for state and server-data management, reducing re-renders by **~30%**
- Implemented **60s auto-refresh** with loaders and **robust error handling** for a seamless, production-grade user experience
- Applied **Web Performance Optimization** techniques and ensured **cross-browser compatibility** across dynamic data refresh cycles

AI-Powered Movie Recommendation Platform

Tech Stack: React | JavaScript | FastAPI | Python

- Built an **AI-powered movie recommendation engine** using semantic embeddings, to deliver personalized results from **1K+ movies**
- Implemented **FastAPI-based REST services** handling **100–200 similarity comparisons per request**
- Applied **Sentence Transformers + cosine similarity** to improve recommendation relevance by **~40%** over genre-based
- Developed a **React frontend** enabling real-time search and AI-driven recommendations

INTERNSHIP EXPERIENCE

Ylurn Technology | Mobile APP Developer

Feb 2021 – Apr 2021

- Formulated the **seller-side app** for a shopping platform using JavaScript **React native**, **Express JS** and **Axios** for HTTP request
- Designed an interactive, responsive UI with one-way data flow and integrated with **REST APIs** for seamless data management

Eduvisory | Web Developer

Jun 2020 – Dec 2020

- Built the Eduvisory website with React JS to assist students in 20+ countries, using responsive **Ant Design** and **Material UI** navigation
- Implemented **login authentication** with **Express JS** and **MongoDB**, and built a forum to manage user queries and responses
